

Bristol Pledge

RADE is asking everyone to take the **Bristol Pledge** alongside 3 of our MP's, our MEP, and a growing number of local Councillors, citizens and organisations

RADE's Bristol Pledge

Support "Poverty is the only excuse for burning wood in the city"

Not Burn Wood or Solid Fuel

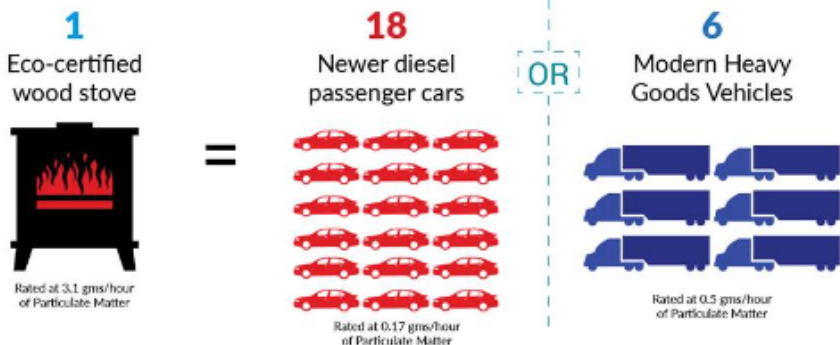

Not eat food cooked in Wood Ovens

Make Wood Burning Stoves unfashionable

Because;

All Woodstoves Pollute

Even a well-run, certified wood stove emits far more harmful fine particulates *per hour* than many diesel vehicles

Data from: "Potential Air Quality impacts from Biomass Combustion", Air Quality Expert Group (UK), 2017

A wood stove would never pass vehicle emission standards, yet we allow them to run for hours on end, right where we live, play and go to school.
